Professional Summary

Tech-driven BSc. CSIT student with strong expertise in full-stack web development, AI-powered applications, UI/UX design, graphic design, and digital content creation. Experienced in designing and developing modern web platforms using Python, Django, Flask, JavaScript, React, and related technologies. Passionate about combining software engineering, creativity, and user-centered design to build impactful digital products and solve real-world problems.

Education

Bachelor of Science in Computer Science and Information Technology (BSc. CSIT)

Current Status: 4th Semester Student

Technical Skills

Programming Languages: Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: Django, Flask, React, Node.js

Tools & Platforms: Git, GitHub, VS Code, AI Tools

Design Tools: Photoshop, Adobe XD, Canva

Other Skills: UI/UX Design, Graphic Design, Branding, Video Editing, Responsive Design

Projects

Smart College AI ERP System

Developed a college management platform integrating ERP functionalities with role-based dashboards, student management, notices, attendance systems, and AI-powered interaction features.

Portfolio Website

Designed and developed a personal portfolio platform showcasing projects, technical skills, achievements, and professional work with modern UI principles and AI-assisted features.

AI Social Media Platform

Conceptualized a next-generation social platform featuring AI chatbots, recommendation systems, image recognition, and content generation capabilities.

X (Twitter) Clone

Built a social networking platform inspired by modern microblogging applications with responsive design and user-focused interfaces.

Rock Paper Scissors Multiplayer Game

Developed an online multiplayer gaming application featuring scoring systems, attempt tracking, and interactive gameplay.

Interactive Birthday Website

Created an animated web experience featuring meteor effects, balloons, envelopes, stars, petals, and immersive user interactions.

Professional Experience
